Overview

Crisis Assist is an emergency assistance alarm system designed to alert others or summon help in case of an emergency situation. This type of alarm is particularly beneficial for elderly individuals or those with medical conditions who may require immediate assistance in case of accidents or health emergencies.

The Crisis Assist Disabled Toilet Alarm Power Supply Unit can power up to two Crisis Assist 4 Line Disabled Toilet Alarm Controllers and mounts onto a double gang electrical socket box. Battery backup power can also be installed with the addition of a separate battery enclosure.
